Attention: Mr. Marvin Kale
Vice President

Dear Marvin:

Re: Picture Archiving Communication System (PACS) Project at Fraser Health Authority

It is long overdue for me to offer my congratulations and thanks for the excellent job done by KDS on the PACS project at FHA. It is evident from the positive reaction within the Fraser Health community generally that the project has been well received and stands as a model for institutional development. KDS was fundamental to that success.

From the first day of your team's involvement, we were impressed with the “can do” attitude, directness, honesty and problem solving approach demonstrated by all of your site team members. It was evident to me very early, that KDS was determined to align their success with the success of the Owner and through some of the challenges during construction, you demonstrated that serving the Owner well would, in the long-term, result in the most positive result for you.

Please pass on my congratulations and thanks to the entire team and in particular I should mention the contribution of your superintendent Ken Rip during the project. Ken is a pleasure to work with and has not only our complete respect but also, as was evident, the respect of the key trades that made this project happen.

In the challenging times ahead that the industry faces in the next few years with shortages of key resources and expertise, we look forward to working again with you, as we greatly value your abilities and performance.

Yours truly,

STANTEC CONSULTING LTD.
